HISTORY

TRUCK ENGINEERING LIMITED was founded in 1924 and has always manufactured the finest dump bodies. Throughout three wars, WW II, Korea and Vietnam, Truck Engineering Limited supplied the United States armed forces, state governments and municipalities with unique designs to meet their individual needs. Our complete line of 304 stainless steel bodies offer durability and long term performance proving them to be highly cost effective. We strive to provide our customers with the highest quality products to their exact specifications. We take pride in our ability to understand and address the needs of our customers. At any given time 70% of our production is composed of customized products developed by you, the user, to satisfy specific requirements. We look forward to working with you in the near future.
